

Assignment #7,

Due in class, on 3/13.

Read the articles that I handed out concerning new tariffs on U.S. imports of steel (I am leaving some extra copies outside my office).

Think about some data, not show in the articles, that would be useful in determining either:

- (a) whether the tariff was a good idea.
- (b) what will be the likely impact of the tariff.

Write up what you find in a page or less. Include a table or graph of the data you found.
